

Lexington Dental Care

Post-visit instructions

Functional Impression

Your denture has been lined with an impression material that will conform to the shape of your mouth as you use it. This method assures the best fitting denture possible and minimizes sore spots or adjustments needed in the future. You may eat normally, however, refrain from any foods with small seeds or grains that may get stuck in the impression material.

Keep the denture in your mouth continuously until your next dental appointment. If you would like to remove the denture to rinse your mouth, wet your fingers first, then rinse and replace denture immediately.
